

## **Jiyong Park** Yonsei University, Korea

Professor Jiyong Park is working with Yonsei University, Korea since 1994. He received his M.S. in Food Engineering (1982) from University of Massachusetts, Amherst and Ph.D. degree in Food Science & Technology (1991) from Texas A&M University, USA. He worked at R&D Center of CJ Cheiljedang in Korea for more than 10 years (1982-1994) before joining the faculty at Yonsei University. His research interests are focused on development of non-thermal processing technologies for increasing microbial safety and value addition of food products. Specific areas of his research interests are on high pressure processing, ultraviolet light, and ultraviolet-assisted photocatalysis. He has published over 100 articles including 5 book chapters and 12 patents in various international journals. He was elected as President of Korean Society of Food Science and Technology in 2013, and serving its active member since 1982. He is the professional member of Institute of Food Technologists and also a member of International Association for Food Protection.
